

Sure-Fit Change Parts Your Choice – Fixed or Adjustable Tooling

HighSpeed & Ergonomic Cassettes

Take any existing cassette and split the shelves into two. This allows the cassette to drop while the pusher arm is engaged with the product, to decrease cycle time. Each cassette side is now only half the weight of an entire cassette making for easier operator changing.

- Increased packer speed by up to 10%
- Better operator ergonomics
- Available with horizontal adjustability

From \$3,550 USD

From \$1,750 USD

Product Pusher Arms

Made of a welded aluminum tube frame, these pusher arms allow faster packer speeds by allowing a high-speed cassette to lower sooner than older designs.

- Increased speed
- Faster and easier changeover.
- Available with horizontal adjustability

Adjustable Parts vs. Change Parts

Never lose your change parts again. Save time, money and aggravation by making a simple *adjustment* versus using an entirely new change part.

- No lifting of heavy change-parts
- Improved ergonomics
- Changeover time is reduced
- Dispenser Paddles, cassettes and pusher-arms

Pusher Plate

From \$650
USD

A product specific plate that fits onto the end of a pusher arm
